Re: Annual Notification of Pest Control

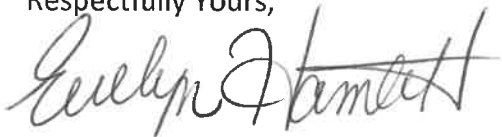

Dear Parents and or Guardians,

Northridge Academy periodically treats its grounds and building with chemicals for routine pest control. Such treatments occur on Saturdays or on Professional Development days. This gives a minimum time lapse of 48 hours between the application of the chemicals in the student areas and the treated areas.

The chemicals are applied around the perimeter of the building and the grounds. The products used is the safest professional product available in the industry. No residue or odor is present at the time of application.

The health and the safety of our students is always our first concern. If you would like to be notified prior to a scheduled pesticide treatment, please complete and return the bottom portion of this form. If you have any questions, please contact the school at the above number, Monday - Friday from 7:30 a.m. until 3:45 p.m.

Respectfully Yours,

Ms. Evelyn Hamlett
School Leader

I would like to be notified prior to any scheduled pesticide treatment at Northridge Academy.
